

**Table 1.1: Consistency between the Program mission and University mission.**

CPM Program Mission		University Mission		
	Academic Contribution to development of the country.	Contribution to scientific research and academic environments.	Maximizing the employment of knowledge techniques	Providing local and global constructive community service.
Academic excellence to develop professional qualities as construction project management expert.	√	√	√	
Involvement in modern engineering technologies		√	√	
Scientific research to pursue higher studies.		√	√	√
Service to the community to serve the country with its particular construction project management	√			√

**Table 1.2: Consistency between the Program mission and College mission.**

CPM Program Mission		College Mission		
	Prepare qualified engineers for the country.	Academic environments.	Modern engineering technologies	Offer engineering services to the community.
Academic excellence to develop professional qualities as construction project management expert.	√	√		
Involvement in modern engineering technologies	√		√	
Scientific research to pursue higher studies.		√	√	√
Service to the community to serve the country with its particular construction project management	√			√

**Table 1.3: Consistency between the Program mission and Civil Engineering Department Mission.**

CPM Program Mission	Civil Engineering Department Mission		
	To provide a distinguished high-quality education and professional skills to develop professional qualities as civil engineers.	To enable them to do innovative research and develop their personal potential to be able to pursue higher studies.	Participation in community services to serve the country with its particular civil engineering needs at large. Offer engineering services to the community.
Academic excellence to develop professional qualities as construction project management expert.	√	√	
Involvement in modern engineering technologies		√	
Scientific research to pursue higher studies.		√	√
Service to the community to serve the country with its particular construction project management	√		√

**Table 1.4: Consistency between the Program’s missions and the Program Objectives (PO)**

CPM Program Goals	Program Mission			
	Academic excellence to develop professional qualities as construction project management expert.	Involvement in modern engineering technologies.	Scientific research to pursue higher studies.	Service to the community to serve the country with its particular construction project management
To equip graduates with diverse knowledge and skills that makes them capable of coping with the complex environment of construction project management	√	√		
To equip graduates for professional advancement, societal values, and leadership responsibility in their respective organizations	√			√
To prepare graduates to pursue advanced degrees or seek professional certification in Construction Project Management or related field	√	√	√	
To prepare graduates to actively participate in professional and scientific activities of the region relevant to Construction Project Management			√	√
