Copyright and Plagiarism Policies

The primary objective of drafting the copyright law for the graduation project is to make understand the ethics of project report writing skills necessary for the graduating students to comply with the stipulated graduation requirements. Graduate students learn to understand the ethics of applying, analyzing and synthesizing and evaluate vital information perceiving towards the project deliverables and implement the outcome of the project successfully towards national transformation. This is advocated by the setoff guidelines or copyright laws proposed by the faculty committee to foster quality projects. The project monitoring committee ensures the plagiarism free content of the submitted final senior graduation projects. Workshops will be held for final year students to explain how to write their graduation projects report and focus on copyright laws and regulations. These laws will be followed up by a committee established at the college level and supervised by the vice-dean. This is ensure date very stage of project execution till final completion by implementing the fair copyright laws as suggested below:

i) Students are given an initial workshop before the start of the final graduation project on the various aspects of the originality of the project and exposed to the consequences of Plagiarism.
