A MESSAGE FROM THE RECTOR (2016-17)

Introducing to you, the King Khalid University (KKU), which includes nearly 50 colleges spread in 13 provinces in Asir region, and in it are more than 7,000 working faculty members and employees. The university provides services for more than 72,000 students. King Khalid University is looking forward for the continuous development and improvement of educational processes and the curricula. It has contacted a number of international agencies, and has held a large number of seminars and conferences that will support the development and improvement of curricula as well as educational and research operations. As a result, the university has achieved advanced leaps in respect of scientific research at the local and global levels, all thanks to Allah. The institution includes a large number of research and scientific centers which work to bring out a lot of relevant researches in all the disciplines of the university, whether health, scientific, humanitarian or educational. The university seeks to achieve the third main goal - which is serving the community). For that, it has made many community partnerships with different sectors. The most pioneer example is holding the community partnership forum recently. In the forum, the university has cooperated with a number of governmental agencies and various private institutions. This comes to prove that the university is an integral part of the society, and the society is an integral part of the university. Praise be to Allah, the university has received in this year, the highest historic budget since its inception. This generous budget is credited to God Almighty, and then to this great country, led by the Custodian of the Two Holy Mosques King Salman bin Abdul Aziz Al Saud, and the Crown Prince, His royal Highness Prince Mohammed bin Naif bin Abdul Aziz, the Deputy Crown Prince, His royal Highness Prince Mohammed bin Salman bin Abdul Aziz, as well as to the continuous support of His Excellency the Governor of Asir region, Prince Faisal Bin Khalid bin Abdul Aziz.

Prof. Falleh R. M. Al-Solamy
Rector of the University

A MESSAGE FROM THE DEAN

It is gratifying that the staff of the College of Engineering approach their institution's vision and goals from their respective fields of specialization. We, teaching staff, technicians, and administrators, work in unison to produce highly qualified graduates who are committed to the ethics of their profession and whose capacity and skill will represent an added value to their prospective institutions. To achieve its goals, the Faculty has been adopting the following three major guiding principles and strategies.

First and foremost, the College of Engineering has succeeded in creating an unconventional learning environment where knowledge is sought, shared, and developed and where initiative is encouraged and valued among staff and students alike. Students, upon engaging in any learning process, are encouraged to be inquisitive when attending workshops, having access to laboratories, and using electronic resources. The major principle that all faculty members adhere to is: who benefits most from knowledge is he who shares it with others; and, as knowledge management specialists say: mastering knowledge results from teaching it. In our quest for satisfying our curiosity, we have done away with the compartmentalization of knowledge imposed by each department's specialism, but we have observed the organizational structure of the Faculty in our administrative dealings. Indeed, the Faculty of Engineering gives all its students, irrespective of the department they are enrolled in, the opportunity to develop their professional skills further through various training activities that aim at enhancing their competencies in taking part in job interviews, writing their resumes, and participating in the faculty training programme which seek to broaden their cognitive capacities and refine their specialized and professional competencies.

Second, the Faculty has been engaged in a cyclic review of its teaching curricula because it holds the firm belief that engineering is a fast changing science and that the work market for engineers requires that they be up-to-date with changes and progress. For this reasons, we have been engaged, within the confines of the university rules and regulations, in keeping abreast with the latest developments by introducing small, but when necessary significant, amendments to our curricula. We

have also made sure that these amendments in the curricula are operationally effective through field visits and fieldwork because we are convinced that such activities bring theory and practice closer together.

Third, the Faculty has been engaged in reinforcing its openness to the outside world. We believe that every judicious interaction the College of Engineering undertakes with other institutions yields mutual benefits for both parties. By adopting a win-win strategy, our Faculty has succeeded in signing partnership contracts with various companies and faculties, and it is determined to continue to do so. These contracts aim at identifying job opportunities for graduates, exchanging knowledge and skills, developing staff understanding of the market needs, and serving the community.

Dr. Ibrahim Idris Falqi

Dean, College of Engineering

INTRODUCTION

King Khalid University (KKU) is considered one of the best educational institutions in the Kingdom of Saudi Arabia. Since its establishment in 1998 AD (1419 H), it is offering the best higher education programs and many of the finest leads in Saudi Arabia had been graduated from KKU, and they have contributed in the development of the country.

UNIVERSITY VISION:

King Khalid University in the top 200 universities worldwide by 2030.

UNIVERSITY MISSION:

To provide an academic environment conducive to teaching, learning, scientific research and social contribution through optimal utilization of our resources.

UNIVERSITY GOALS

- To enhance teaching and learning quality.
- To provide a facilitative academic environment.
- To promote effective partnership with the community.
- To support and promote scientific research.
- To improve graduate studies.
- To develop institutional performance.
- To increase financial resources.

UNIVERSITY VALUES

- Honesty
- Commitment
- Respect
- Excellence
- Innovation
- Transparency

CODE OF ETHICS

King Khalid University (KKU) is committed, in all its policies, decisions and dealings with ethical framework. It is also governed by a set of values derived from the teachings of our Islamic religion which have been approached by this country's leaders. Moreover, these values are consistent with the Ministry of Education's policies and are in harmony with the pursuit of King Khalid University into a unique excellent university. So, the university's concerns are not confined only to the educational, research and community service activities, but it ensures that it is an academic institution which offers these three functions under a framework of ethical values. There is no doubt that the multifunctionality of the university and the increasing and complexity of the undertaken tasks, as well as the increase in internal and external relationships, have imposed the need for an ethical framework that instructs and directs the behavior of its employees, especially at varying points of view about a particular behavior pattern. Here ethical framework comes to set a number of specific ethical trends, standards, responsibilities, controls and caveats, that are agreed upon and which govern the practices within the university community. However, the ethical framework is so different from the terms, rules or regulations, in that it is a declared agreement among a group of sides on framework of ethical values and specific set of behavior rules in various situations. For that, it represents a compelling ethical value for all.

Student Guidebook:

ABOUT THE UNIVERSITY

The Custodian of the Two Holy Mosques King Abdullah bin Abdul Aziz God's mercy be upon him had announced (When he was the crown prince) on Tuesday, 01/09/1419 H, the establishment of King Khalid University by integrating the branches of University of Imam Muhammad bin Saud Islamic University and King Saud University in Abha. Then he issued Royal Decree No. 7/78/M on 11/3/1419 H to complete the necessary legal procedures. Accordingly, the first budget of the University issued on 14/9/1419 H within the general budget of the kingdom to include King Khalid University within the Saudi universities system.

LOCATION AND CLIMATE

The University is located in Aseer province in the south-western part of the Kingdom of Saudi Arabia. Aseer province an area of about 81,000 sq. km, live by more than 2.881 million people deployed in seventy-eight governorate and center. The University complex is located at the latitude of 18°14'59.845"N and longitude of 42°33'32.799"E. The area is subject to rain, sometimes heavy; some of its neighboring villages and rural areas are sometimes the witnesses of flash-floods during the winter. The topography of the area is undulating and the elevation from the mean sea level is 2130 m. The average annual rainfall is 355 mm. The precipitation is mainly occurring between June and October every year. Average minimum and maximum temperatures are of 19.3° and 29.70 °C, respectively. Jabal Al-Sooda, one of the most famous mountains in the area, located in the north-western part of the university, 2982 m high, and has also a rich flora.

Academic Colleges and Programs

King Khalid University began after its inception in 1419H by four colleges in Abha, a College of Sharia and Fundamentals of Religion, College of Arabic Language and Social and Administrative Sciences, College of Medicine, and College of Education. Then the university has seen a significant expansion of colleges to include all the provinces of Aseer province until it reached 56 Colleges. Then, it has re-structuring of existing colleges and the established a number of new colleges including women's colleges in Aseer province, in attrition to the colleges of teachers in Abha and Bisha as well as the colleges of health sciences. In 1435 H, the Royal Order to transfer Bisha branch to University of Bisha, which includes all colleges in the provinces of Bisha, Al-Namas, Balgarn and Tathlith. Now the number of colleges in King Khalid University College is 34.

<http://www.kku.edu.sa/en/colleges/>

The University's Faculties

As known, the King Khalid University began with 4 faculties in Abha, then the existing faculties were restructured, new faculties were introduced and the females' faculties in Aseer, the teachers' faculties in Abha and Bisha and the faculties of Health Sciences were annexed to the University. Summing a total of 49 faculties, after which a high decree was issued to convert the King Khalid University branches in Bisha, Namas, Balgarn and Tathleeth to an independent University of Bisha, bringing the number of faculties down to 34. <http://www.kku.edu.sa/ar/kku/deanship/>

ACADEMIC PROGRAMS AT KING KHALID UNIVERSITY

Growing interest in Saudi Arabia to work hard on continuous development, spread the quality of education at all levels, raise the level of university graduates, and as one of the most important leading comprehensive development factors to achieve leadership desired at various local, regional and global levels, King Khalid University is offering 106 academic program covers the different sectors of education (humanities, basic science, health science and engineering) and the degrees, both intermediate diploma and bachelor's in addition to three degrees for Graduate Studies (Higher Diploma, Master's and PhD).

Total number of the academic programs according to the degrees

Name of the Degree	Number of the academic programs
Medium Diploma	6
Bachelor	43
High Diploma	13
Master	22
Parallel Master	18
PhD	7

COLLEGE OF ENGINEERING

<http://engineering.kku.edu.sa/en/>

About College

The Royal Decree Order No. (7/B/4096) was issued on 14/03/1420 H to establish the College of Engineering. The establishment of this college was decided to keep pace with the renaissance of the Kingdom in many areas as the engineering is a profession that employs science to serve the welfare of society as well as to follow the scientific progress and technology in the twenty-first century to meet the engineering labour market needs in the southern and south-western regions of the kingdom. The college started its activities and functions on the academic year 1422/1423 H where 110 students were accepted in the first semester, they were distributed in the departments of Mechanical Engineering and Industrial Engineering.

Awareness of the university to keep up with the prospects of the scientific and technical development and the contribution of the university in filling manpower requirements in the fields of engineering with qualified engineering staff according to the development plans of the Kingdom necessitated the establishment of the departments of Electrical Engineering, Chemical Engineering, Civil Engineering departments as well as the department of Architecture and Planning.

COLLEGE VISION

To meet the international standards as a source of excellence in engineering learning and center of research in the university.

COLLEGE MISSION

To prepare a qualified engineering staff equipped with essential knowledge and skills in dealing with modern engineering technologies, in order to develop and improve our country's future plans.

COLLEGE OBJECTIVES

- Development and innovation of engineering curricula studied to the changing needs in this field
- Configuration of strategic relationship with local and world-wide universities for research partnership and technology transfer
- Encourage and support professional development for staff members and students
- Support education and scientific research by academic services and effective management and technology
- Contributing into the development of the community by preparing and organizing educational programs and trainings in engineering continuously

Administrative Flow Chart: College of Engineering, King Khalid University

The College of Engineering Strategic Themes

Sl. No	Strategic Theme	Description	Strategic Objectives
1	Academic Excellence.	The College of Engineering aims to provide the society with competitive engineers and developing the engineering profession in the Kingdom of Saudi Arabia.	<ul style="list-style-type: none"> • Developing students' skills. • Advanced training programs. • Increasing the proportion of PhD's teaching staff. • Increasing the College Enrollment criterion.
2	Participative cognitive and research environment.	The College of Engineering aims to develop a participative cognitive and research environment for students and teaching staff to keep up with local and international developments.	<ul style="list-style-type: none"> • Expansions in spending on scientific research. • Support of local and international scientific partnership. • Balance between intake capacity and resources. • Improving quality-level of technical facilities.
3	Effective competitive academic programs.	The continuous improvement of the academic programs to satisfy the new developments in market requirements and needs.	<ul style="list-style-type: none"> • Achievement of local and international accreditations. • Development of specialized academic programs.
4	Meeting the requirements and	Providing the local and regional community with the engineering	<ul style="list-style-type: none"> • Community partnership. • The consultation services.

Sl. No	Strategic Theme	Description	Strategic Objectives
	needs of the labor market.	services as research and consulting.	<ul style="list-style-type: none"> • Meeting the requirements of the skilled manpower.
5	Diversification of sources of income and the optimal resource utilization.	Diversification of sources of income and the optimal resource utilization.	<ul style="list-style-type: none"> • Activation of the consultation services. • The College Awkaf. • Improving the cost effectiveness.
6	Institutional development.	Improving the institutional procedures, processes, and policies.	<ul style="list-style-type: none"> • Improving management performance. • Professional accreditation.

STRATEGIC ISSUES OF THE COLLEGE OF ENGINEERING

http://engineering.kku.edu.sa/sites/engineering.kku.edu.sa/files/general_files/files/Strategic%20issues%20of%20the%20College%20of%20Engineering.pdf

A. STUDENT ADMISSION

Students are centrally admitted by the Deanship of Admission and Registration, King Khalid University. The new applicants are accepted directly to the Bachelor of Science Engineering program but they must complete one year in the 1st year program. University Council decides the number of students to be admitted for each academic year according to the recommendation of college council. The deanship of admission and registration implements all policies in line with the college of engineering. Admission takes place only once each year in the beginning of the academic year (1st Semester).

Requirements of admission to the Bachelor of Science program:

- Secondary School Certificate (Natural Sciences) or its equivalent from inside or outside the Kingdom of Saudi Arabia.
- Score of "Entrance Examination" which resides of an aptitude test, and a subject test. The test is conducted by the National Center for Assessment in Higher Education, Kingdom of Saudi Arabia. It has two sections. The first section is General Aptitude Test (QIYAS). This test measures a student's analytical and deductive skills. It focuses on testing the student's capacity for learning in general regardless of any specific skill in a certain subject or topic. The other section is called "Achievement test for Science Colleges (TEHSILI)". This section

covers the general and key concepts in physics, chemistry, biology, mathematics and english covered in the courses of General Secondary School.

- Character certificate from the Secondary School.
- Appearance in interviews required by the University Council.
- Physical fitness certificate.
- Permission from the employer (For employed candidates).
- No objection certificate of suspension/rustication from King Khalid University (KKU) or any other university.

All the above conditions are considered for admission fulfilling by the applicants. A merit list of all applicants is prepared by the Deanship of Admission and Registration on the basis of the following weights to the three types of scores:

- Secondary school certificate score (30%).
- Aptitude test score (30%).
- Achievement test score (40%).

Applicants are offered Admission in a college of their preferences on the basis of merit list subject to the availability of seats. Once seats are filled in a particular college, the admission to that particular college is closed and remaining

students have to make their choices from other colleges. All freshly admitted students to the College of Engineering seeking acceptance to the Bachelor of Science in concern program spend their first academic year.

The major objectives of 1st year program are

- To improve the students' English language proficiency, this is the principal language of instruction in College of Engineering.
- To ensure the students' abilities to communicate effectively
- To strengthen the students' knowledge in mathematical and analytical techniques, and calculus-based physics.
- To develop computer skills of the students.

The duration of the 1st year program is for one academic year, divided into two semesters, as well as a summer semester, if required. The 1st year program represents the first two semesters of the Bachelor of Science in concern program. The complete program resides of 10 levels covering over a period of five (5) years. The courses offered in 1st year program are Intensive English program-I, General Chemistry, Differentiation and Integration-I, Engineering Drawing-I, Intensive to Islamic Culture, Intensive English Program-II, Algebra and Geometry, Physics-I and Computer Science. Based on their performance in the 1st year program, and in accordance with the implementation rules, students will be able to select the major of their choice. An orientation session is held during the second semester of 1st year program for students to learn about all programs in the Engineering College to help them in select the program that suits them the most.

On successful completion of the 1st year program, the performance of students seeking admission to the Bachelor of Science in concern program is evaluated based on the GPA in the 1st year program. A merit list of these students is prepared and the department accepts the allocated number of students from the top of the list.

The admission procedures are regulated by the "Education and Examination Regulations" available at the following URL (Note it is a common set of regulations for all colleges):

http://dar.kku.edu.sa/sites/dar.kku.edu.sa/files/general_files/files/Lae7ah.pdf

B. Evaluating Student Performance

A Faculty acts as an academic advisor for the student of BSc. Program. The academic advisor helps the student in selecting courses for registration in each semester according to the study course plan of the program. The study plan available for the students and the academic advisors online at the URL: www.kku.edu.sa and is also available with the chairman and the coordinator of the department. Based on study course plan, a student can register online. The maximum of 20 credit hours course load is allowed to a student. The coordinator of students registration for the college can allow the exceptions based upon the performance of the student during the last few semesters.

The course coordinator evaluates the students' performance for each course. The course coordinator designs the assessments for finding out the achievement of the course learning outcomes specified by the Curriculum Committee. The assignments, quizzes, continuous assessment examinations, and final examination can be used by the course coordinator to evaluate students' performance, while for the courses involving laboratory classes, laboratory written

reports (for the lab work throughout the semester) and the laboratory final examination, are used to assess the achievement of the learning outcomes. The program has formulated a grading policy Based on the Policy and implementation rules of examinations and grades, which was approved by the Department Council.

B.1. Examination and Grading System

As part of the assessment and evaluation of students' skills and competencies, the following mechanisms are used:

- a) Continuous Assessment Test (CAT) - 50 %
- b) Term End Final Examination (TEFE) - 50 %
- a) The Continuous Assessment Test (CAT) have components such as CAT-I, CAT-II, assignments, mini projects, seminars, viva voce, quizzes and class participation. The breakdown of marks in given in the table I.
- b) The term-end final examination carries 50% weight and is a compulsory aspect of the assessment process.

Table 1: Distribution of marks

S. No.	EXAM Particulars	Marks
1.	CAT - I	15
2.	CAT- II	15
3.	Assignments/ Projects/ Lab Reports/ Quizzes/ Seminars/Viva Voce/Faculty Observation	20
4.	Term-end final examination	50
	Total	100

The grading systems of King Khalid University are shown in table 1. The course coordinator awards the grade as per marks out of 100. The marks are converted to a letter grade and grade points as depicted in table 2. Table 3 shows an example of student's grade report for the subjects in a semester.

Table 2: The grading system in King Khalid University

Letter Grade	Grade Percent (%)	Description	Grade Points Per Credit Hr. (on scale of 4)	Grade Points Per Credit Hr. (on scale of 5)
A+	95-100	Excellent	4.00	5.00
A	90-94		3.75	4.75
B+	85-89	Very Good	3.50	4.50
B	80-84		3.00	4.00
C+	75-79	Good	2.50	3.50
C	70-74		2.00	3.00
D+	65-69	Satisfied	1.50	2.50
D	60-64		1.00	2.00
F (FAIL)	<60	Failure	0.00	1.00

Table 3: Example calculation of GPA

Course	Credit Hrs. (CH)	Marks (Out of 100)	Letter Grade	Grade point per credit hours (GP)	Total Grade Points (CH) X (GP)
CE 1	3	91	A	4.75	14.25
CE 2	2	96	A+	5.00	10.00
CE 3	4	80	B	4.00	16.00
CE 4	3	87	B+	4.50	13.50
CE 5	2	71	C	3.00	6.00
CE 6	4	86	B+	4.50	18.00
CE 7	2	90	A	4.75	9.50
Total	20				87.25
Computed GPA = Total Grade Points / Total Credit Hours = 87.25/20 = 4.36					

If the course requirements are not completed by the student, Grade of "Incomplete" (IC) is given to the student. This is usually permitted in courses that require a course to be completed by the students on the recommendation of the course coordinator and approval of the Department Council. If the student doesn't completes the requirements during the next semester the IC automatically changes to "F". The student gets "In Progress" (IP) grade, if the course requires more than one term to be completed particularly the Graduation Project. It does not require the approval of the

Departmental Council. Student getting an IP is required to continue the course and appear for the assessment when the course is completed. King Khalid University requires that atleast 75% of the total number of lectures, labs and tutorials to be attended by the students. Students failing to meet this requirement in any of the courses are barred from attending the term end final examination of that course and earn a "Denied" (DN) grade in that course. The department council and the Dean of the college can allow the student, who is absent in the final examination of a course(s) for a valid reason, to take the examination at a later date.

B.2. Minimum GPA

The KKU Legal Advisory Council has approved 2.00 of 5.00 point scale as minimum GPA for the program. According to the regulations of King Khalid University all students are required to maintain a grade point average of at least 60% out of 100%. A student who cannot maintain the GPA of 60% will be placed on "academic probation" and is given two semesters to improve his GPA. After this period the student may be removed from the program.

B-3. Registration Procedure and Pre-Requisite

During the time of registration process as per the university academic calendar, all students are registered automatically through the University computerized registration system, under the aegis of Deanship of Admission and Registration, following a model study plan set by the concern department. This plan includes all prerequisites and maximum and minimum acceptable number of credit hours per semester. The system allows the student to make changes and adjustments within the preset rules under the guidance of the academic supervisor. It is during the first

week of classes that students are allowed to make changes, such as add and drop the course (s). Afterwards, only course withdrawals are allowed provided they are done five weeks before the final examination period, and with the approval of the department steering committee.

Student is not allowed to register a course without taking the prerequisite courses as stated in the program study plan. The academic advisors are not authorized to allow a student to register in a course without satisfying the pre-requisites under any circumstances. Pre-requisites are automatically checked by the university electronic registration system. It does not register any course unless the student has passed the pre-requisite courses. The registration department has the data of perquisites in their system. It does not allow any student to take a course without a pre-requisite taken already.

B-4. Academic Probation

The Deanship of Admission and Registration provides full academic advising related to study course plan as well as the number of academic warnings at the beginning of each term. The student gets a warning if his CGPA is below 60% out of 100% in a semester (level). If the student gets a maximum of three (3) such consecutive warnings is subject to suspension. After the third warning, being suspended for one term, College Council, in liaison with the Deanship of Admission and Registration, may recommend to the University Council to give a fourth (4) chance to those students who can increase their CGPA by taking courses according to the rules of admission and registration.

B.5. Theory & Laboratory Session

For the theory courses, one lecture hour of 50 minutes duration per week for a semester earns one credit, whereas for laboratory, two practical hours (with duration of 120 minutes) per week earns one credit.

B.6. Students' Performance

Students' performance in the Continuous Assessment Tests (CAT), Term End Final Examinations, Assignments, Quizzes and Laboratory activities are considered for course level outcome assessments.

B.7. Students' Work - Collection of Sample Materials

One of the key components of the program assessment tool is the students' work which shows the performance of the students in a semester. Graded examination papers, project reports, and written material (assignments) submitted by students form the sample student portfolio. They are collected each semester.

B.8. Project Work

The project work is the most important tool used for the assessment of the outcomes.

- Project or thesis requirements in the Bachelor of Science program: As per the prerequisite for registration, the number of hours remaining from graduation should not exceed 36 hours (Sum of semester 9 and 10 and addition 7 hours: $16+13+07=36$)

- Project work is carried out under the supervision of a faculty member in the respective specialty.
- A candidate may, however, be permitted to work on the project (under the supervision of a faculty member) in an Industry/Organization on the recommendation and approval of the Dean, faculty of Engineering.
- The work in the graduation project extends over two semester (9 and 10 semester), and the student is granted a continued grade by the end of first semester after the project registration. By the end of second semester, he is granted his final grade after presenting and submitting the project report to faculty committee.
- In case the student failed in the graduation final project, given a chance for one more semester and will be eligible to present and submit the project to the faculty committee by the end of that semester.

B.9. Quality Control Meeting

Quality Control Meetings bring together the members of faculty, Program Chair, coordinator to review the student work samples and obtain feedback on courses from the students and assess the student outcomes. The meeting results in making recommendations for improvement the courses, curriculum, teaching methods and interaction with the students.

B.10. Students' Feedback Survey

The student feedback is collected at the end of each semester for the courses taken as a part of the program. The data are collected and synthesized by the respective faculty and discussed in the Quality Control Meetings. The Quality

Control Meetings collectively review the input; make recommendations for improvements in curriculum, course or program. Student feedback is used as an important tool in the assessment process. The student feedback instrument uses a '5' point scale with following the categories:

5 – Strongly Agree, 4 – Agree, 3 – No Opinion, 2 – Disagree, 1 – Strongly Disagree.

C. Transfer Students and Transfer Courses

Transfer can be done through three different channels as follows:

C-1 Transfer from Other Universities

A student transfer from the other university may be accepted if he has studied at a recognized university or college and has not been suspended from that institution based on disciplinary or academic grounds.

The transferring applicant must study at least 60% of the required courses at KKU and must not have spent more than 6 terms at the university he is transferring from. The applicant is required to acquire an approval from the Dean of College and head of the department, KKU. These requirements and process for accepting transfer students are governed by the Policy on Regulations of Study and Examinations available in university website.

Credits for courses taken by the students outside the university (KKU) may be transferred provided the college council based on the recommendations of the concerned department offering the equivalent courses approves the transfer of credits. The equivalent courses are documented in the academic record of the applicant being transferred. The

equivalency credits are granted for only those courses in which the student has achieved a letter grade of 'C' or above. However the points for the equivalent courses are not used in the computation of CGPA of the student.

The transferred student submit an application for obtaining equivalency credits to the Deanship of Admission and Registration along with the original academic record and certified detailed description of the courses taken by student outside KKU. The Deanship of Admission and Registration refers the application to the department for evaluation of equivalency credit. This evaluation is performed by the academic advisor in liaison with the chairman of the department on a case-by-case basis. The department, after receiving the approval of the college council on the equivalency evaluations, sends the results to the Deanship of Admission and Registration..

The student should have a minimum cumulative GPA of 4.0 (out of 5.0) or equivalent from a recognized college. This is complemented with other conditions developed by the College Council. The procedure for evaluating transfer applications to the College from outside the university is as follows:

- Application form
- Upon receiving all applications, the university registrar office sends all applications that fulfil the College requirements to the College's Vice Dean of academic affairs office. The college Vice-Dean of academic affairs office prepares the applicants information for the College dean. The College Dean evaluates the applications information and makes decisions.
- The maximum allowable percentage of credit hours that could be transferred by students from other universities is 40% of the total credit hours in the curriculum.

Students who want to study some courses in other universities must do the following:

A Duly filled course transfer form and submit it to the department chairman.

- The chairman consults the faculty who teaches the course.
- The faculty reviews the syllabus of the transfer course in accordance with the departmental course syllabus verifying the equivalency of the syllabus and credits.
- The chairman approves the equivalency and signs the form.
- The student should then receive the approval of the vice dean.
- The student submits the form to university registrar office and gets an official acceptance letter to study the course at the university.
- After completing the course, the student should get an official completion letter and the transcript from the registrar office of the university where the transfer course was completed.
- Finally the student should submit the official completion letter to the KKU registrar office.

C-2 Transfer of students within the University

Student can apply for transfer only after studying at least one term in the College. The student must fulfil the College admission conditions which are announced on an annual basis.

The procedure for evaluating transfer applications is as follows:

- A duly filled transfer form (Inter-College Transfer Form).
- Submit the form to the College Vice-Dean.
- After receiving all applications, a designated college-based committee recommends on transfer applications. If the number of eligible applicants is high, students with the highest cumulative GPA are preferred.
- The tentative transfer decisions are then forwarded to the dean for final approval.
- The academic committee of the department reviews transcripts of all tentatively accepted transfer students and decides on the equivalency of credits based on an equivalency table of credits approved by the College Council.

C-3 Transfer to a department within the College

The procedure for transfer applications between departments within the College is as follows:

- A duly filled Inter-departmental Transfer Form.
- Get the approval of the chairman of the department to be transferred to.
- Submit the form to the College Vice-Dean.
- Upon receiving all applications, a designated college-based committee decides tentatively on transfer applications. If the number of eligible applicants is high, students with the highest cumulative GPA are preferred.

- The tentative transfer decisions are then forwarded to the dean for final approval.
- The academic committee of each department reviews transcripts of all tentatively accepted transfer students and decides on the equivalency of credits based on an equivalency of credits approved by the College Council.

D. Advising Students and Career Guidance

Student advising and career guidance are among the most important aspects of the academic process at KKU. Following features for Advising Students and Career Guidance are

- Forming committees' for student's orientation
- Assign an academic supervisor for each student
- Announce 10 office hours for each faculty member to be part of the academic supervision and scientific help.
- Every student has mentor and buddy to assist throughout the program
- Faculty member help and support students solving problems
- Faculty member advice students planning their career
- The availability of full information about the department and its members, and their contact information.
- The availability of full information about study plan and the courses taught.

Students are assigned academic advisors to provide advice on matters related to curriculum, professional practice and life on campus. Students' progress is monitored on an ongoing basis to assist in course selection, projects, industry assignments, and placement. The Placement and Training Office, in collaboration with the faculty in

the department, provides career guidance, brings experts from industry to discuss about career choices, offers ongoing skills development programs, arranges interview sessions for students in their fourth year of study and assures that the career guidance and support results in excellent placement.

D.1 Program Chair

Program Chair is responsible for advising the students on program related issues. He chairs the Quality Control meetings and also guides the students in getting industrial internship, projects and assignments in industry.

D.2 Faculty Advisor

In the Concern Engineering program, all faculty members serve as undergraduate student advisors. Each student is assigned a faculty advisor (FA) at the time of his initial enrollment. To ensure the effectiveness of the advising system, the number of students assigned to each FA does not exceed 50. The university considers student advising by the faculty members as an important aspect of the teaching and learning process. Each faculty member devotes at least ten hours per week in student advising.

The Faculty advisor has five major duties:

- Advising students on course selection and registration
- Monitoring academic performance
- Compliance with graduation requirements

- Offering assistance to students who face academic difficulties
- Work with the Placement and Training Office to offer career guidance

Based upon discussions at a departmental faculty meeting between faculty staffs and the Dean, the concern department head and Vice-Dean of development and Quality of College, the College of Engineering implemented an advisor evaluation process starting in 2nd Semester 2015 to provide feedback to advisors on their performance in the advising process. Student advisees rate their faculty advisors on a 5 grading scale (1 strongly disagree and 5 strongly agree) as to their: 1) Concern for the student, 2) Knowledge of the curriculum, 3) Availability during advising week and 4) Encouragement of the student. Scores for all faculty members in each department are compiled by the College of Engineering and sent to all faculty within the department for feedback.

D.3 Students Counseling Center

The Student Counseling Center provides assistance to students on matters other than the academic ones. Students receive guidance and counseling on matters pertaining to social, psychological, financial and family issues.

D.4 Students Welfare Office

The student welfare office serves as a vehicle to facilitate extra-curricular activities for the students. It also facilitates students' involvement in the activities of the student government, social functions, and professional organizations.

D.5 Placement and Training Office

The Placement and Training Office (PTO) is one of the most important organizational units of KKU, established to prepare students for their professional careers. PTO works with faculty, students, industry and the governmental agencies in providing career guidance, enabling interaction with industry, creating opportunities to discuss career choices with experts from industry, training students, identifying placement opportunities and helping the students find excellent placement opportunities.

E. Graduation Requirements

- 1) Student graduates after successfully completing all graduation requirements according to the degree plan, provided that his cumulative GPA is not less than pass.
- 2) If the student has passed the required courses but his cumulative GPA is low, the College Council, on the basis of the recommendations of the council of the department concerned, is entitled to specify the appropriate courses that the student must complete in order to improve his GPA.

E.1 Time limit for graduation

A student is expected to carry full time study of five years to complete the degree requirements. However, the maximum time allowed to complete the degree requirements is ten (10) years i.e. 20 terms. In rare cases, a student may be allowed to extend the time due to medical reasons.

Student Learning Outcomes (SLOs)

ABET Code	DOMAIN	NCAAA Code	SLO Description
-	A	PLO-a1	To state the knowledge of mathematics, science and engineering fundamentals relevant to engineering, together with in depth knowledge of Concern Engineering Program
-		PLO-a2	To relate the knowledge of societal, health, safety, legal, management, sustainability and cultural issues and the consequent responsibility reverent to Concern Engineering Program
a	B	PLO-b1	An ability to apply knowledge of mathematics, science and engineering.
b		PLO-b2	An ability to design and conduct experiments, analyze and interpret data.
c		PLO-b3	An ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, constructability, and sustainability
e		PLO-b4	An ability to identify, formulate, and solve engineering problems
h		PLO-b5	the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
k		PLO-b6	An ability to use the techniques, skills, and modern engineering tools necessary engineering practice
i	C	PLO-c1	a recognition of the need for and an ability to engage in lifelong learning

ABET Code	DOMAIN	NCAAA Code	SO Description
d		PLO-c2	The ability to function on multidisciplinary teams
f		PLO-c3	An understanding of professional and ethical responsibility
j		PLO-c4	a knowledge of contemporary issues
g1	D	PLO-d1	An ability to communicate effectively (written)
g2		PLO-d2	An ability to communicate effectively (Oral)
	E	e	Not Applicable

(A) Knowledge; (B) Cognitive skills; (C) Interpersonal skills & responsibility; (D) communication, information technology & numerical skills; (E) Psychomotor skills

DEPARTMENT OF CIVIL ENGINEERING

Civil Engineering Program Description

The faculty of engineering started with six departments: Civil Engineering, Mechanical Engineering, Electrical Engineering, Chemical Engineering, Industrial Engineering and Architecture. The authorized body i.e. MoHE (private institutions and Council of Higher Education for public institutions) has approved the all aforesaid programs via. MoHE/9683 dated 05/08/1426. Until the 1st Semester of 2007 the Bachelor of Science in Civil Engineering program resides in the Department of Civil Engineering. The first batch of students in Civil Engineering graduated in 2012. The needs of the industry and the university's ability to respond to the needs have helped shape the growth of the programs offered by the department. The faculty/staff of the Civil Engineering (CE) Department has implemented many modifications to the CE curricula.

Civil Engineering Program Vision

Providing excellence in Civil Engineering education, leading to meet the international standards as a source of excellence engineering learning and center of research in the university.

Civil Engineering Program Mission

To provide a distinguished education and professional skills in Civil Engineering that enable graduates to use modern technology to develop society through professional practices, ethical practices, innovative research practices and community services.

Program Educational Objectives (PEOs)

The Program Educational Objectives of the CE Program describe what graduates are expected to attain in the years after graduation. They could:

- Successfully enter the civil engineering profession as practicing engineers and consultants with prominent companies and organizations.
- Incorporate economic, environmental, social, safety and global considerations when designing and investigating different systems.
- Pursue professional licensure and engage in continued learning through professional development.
- Pursue graduate education and research at major research universities in civil engineering.
- Demonstrate leadership and service within their profession and in their communities through participation in professional societies and community services.

Graduation projects (Second semester 2017-2018)

Title	Supervisor
Flexural Design of Steel Fiber Reinforced Concrete	Dr Shiva Kumar Anandan
Dynamic Design Of Reinforced Concrete Framed Structural Configurations	Dr Shiva Kumar Anandan
Efficient Channel design of wadi based on hydrological analysis at New Campus King Khalid University, Farra, Saudi Arabia	Dr Javed Mallick
Structural Analysis and Design of the Main Square of King Khalid University.	Dr. Yasser Alashker
Structural Design of Covered Ground Large Capacity Steel Water Tanks	Dr. Yasser Alashker
Design of Digital Terrain Model	Dr. Shams Al Deen Saad
Behaviour of Strengthened Reinforced Concrete Beams under Shear Stress.	Dr. Khalid Al Hadi
Behaviour of Strengthened Reinforced Concrete Beams Under Flexural Stress.	Dr. Khalid Al Hadi

Title	Supervisor
Design of Foundations For a Hotel Building in Khamis Mushyet	Dr. Mahmood Hussain
Design Bio-sand Filters for Water Treatment	Dr. Ahmad Babakar
Study the Engineering Properties of Soil for ABHA City, KSA.	Dr. Ahmad Babakar
Design of a traditional Market using a 3D Truss roof system.	Dr. Mohamed Hechmi Elouini
Analysis and Design of a Multi-story RC Buildings by using Pushover Analysis Method.	Dr. Mohammad Ismail
Design of King Fahad Flexible Paved Road in Khamis Mushait City, KSA Using Both Super pave & Marshall Methods for Asphalt Mix Design.	Er. Isamaldin Yousef
Design of Counter Fort Retaining wall by Analyzing Slope along Abha Muhaiyel Road.	Er. Saiful Islam

Faculty

The Civil Engineering department has a mechanism for hiring the excellent faculty, for continuous professional development and for facilitating the research work of faculty. The Civil Engineering department comprises of faculty with high academic achievements and a rich experience of teaching in various countries of the globe. In addition to academic experience, many faculty have experience in industry, consultancy, and professional organizations. The Civil Engineering faculties have also administrative experience at the college and the university levels. One of the Civil Engineering faculty has been appointed recently as a Dean of the college. The department head of the academic program is responsible for all aspects of management of the program, including curriculum development, instructional delivery, student assessment, schedule of classes and accreditation matters coordination. The department head discharges its duties through the various academic committees formed of specialized faculties for different aspects of management of the program. The department head is not responsible for personnel matters. The department head reports to the Dean of the college. The Dean is the administrative position responsible for all aspects of the academic process in the college.

Faculty Workload

The assigned workload of the faculty is as per the university current regulations and it is according to the academic rank of the faculty. Based on the rank and regulation, the teaching load assigned to the faculty without any extra remunerations are as given below.

- 
1. Professor: 10 credit hours
 2. Associate Professor: 12 credit hours
 3. Assistant Professor: 14 credit hours
 4. Lecturer: 16 credit hours

The faculty have the administrative responsibilities, in addition to academic, assigned lesser teaching load. The teaching load assigned is in line to support the faculty professional development, educational quality improvement activities and for facilitating their research work. The working hours assigned for Saudi faculty are 35 hours per week and for faculty on yearly contract, the working hours are 40 hours per week. The working hours are meant for teaching, research, academic advising, laboratory supervision, and any other tasks assigned to them.

Faculty Size

Currently, the Department of Civil Engineering has 16 professors with PhD degree (1 full professor, 7 associate professors, and 8 assistant professors) and 6 lecturers with M.Sc. degree. The current number of students enrolled in the Civil Engineering program is 398 students (January 2018).

Below figure shows the number of the faculty and staff members and their distribution and also shows the number of the students in the Civil Engineering program for the years 2013 to 2018. The current ratio of faculty to students is 18

(that is 1 faculty member for 18 students) when we consider professors and lecturers). Figure also summarizes that during 2013-2014 the student's enrollment was high due to the government policies to enroll the working professionals in order enhance their technical and professional skills (this is for limited time period, only for one batch).

The current number of faculty and the ratio of students to faculty are significantly adequate to accommodate various needs of students including teaching (introducing the section as per the class size) with reasonable number of students in each, reserving reasonable office hours for students, advising, etc. as well as allow faculty members to perform other tasks and duties related to administrative, research, participation in committees, professional development, etc.

In addition to the above faculty, the teaching assistants are also appointed and some of them sent abroad for higher studies at the expenses of the university. The faculties of civil department hail from diverse background and nationalities i.e. Saudi Arabia, Egypt, Tunisia, India, Sudan and Algeria.

DEPARTMENT OF MECHANICAL ENGINEERING

Mechanical Engineering Program Description

The Mechanical Engineering Department is one of the dynamic department in the College of Engineering. The department offers a single major track program "Bachelor in Mechanical Engineering". The program duration is five years, divided into ten levels (semesters). First and second levels are considered as 1st year program prior to core academics in the department. The program has been ABET accredited and following NCAAA standards for continuous improvement. Currently, there are no alternative tracks offered by the department. However, there are two main fields in the program where the students can specialize in. The first one is the field of production engineering which includes materials science, design, manufacturing etc. and the second one is the field of power which includes thermodynamics, heat transfer and fluids. However, the students are awarded with a degree "Bachelor of Mechanical Engineering" after their successful completion of graduation requirements.

Mechanical Engineering Program Vision

Achieving academic and technological leadership in the field of Mechanical Engineering, contributing through academics and applied research, and participating in the development of the society.

Mechanical Engineering Program Mission

To prepare qualified mechanical engineers who are able to develop, innovate and compete in their professions, besides involving in the scientific research and the community services.

Program Educational Objectives (PEOs)

1. To prepare graduates with high quality education to be creative, distinctive, and capable of running the industrial establishments.
2. To prepare graduates to pursue their personal skills and professional developments through continuous learning.
3. To prepare graduates to apply their academics and conduct research in the field of Mechanical Engineering.
4. To prepare graduates to effectively participate in the sustainable development of the community.

Total No. of Students Registered From Level 1 to 10

Mechanical Engineering
No. of Students Graduated

Mechanical Engineering Workshops and Laboratories

The computer laboratories are all located in the Ground floor of building A, in rooms 21, 23, 29, 30, and 35. Other various specialized laboratories beside the technical workshops are listed in the following Tables.

Table 1: ME Workshops of Mechanical Engineering Program

Workshops of Mechanical Engineering Program		Room No.	Area (Sq Mtr)
1	Non-Conventional Machining Workshop	A/ME/1	130.66
2	Metals Platting & Coating Workshop	A/ME/2	143.4
3	Conventional Machining Workshop	A/ME/3	219.78
4	Welding Workshop	A/ME/4	151.2
5	Sheet Metal Working Workshop	A/ME/4	
6	Foundry Workshop	A/ME/5	130.66
7	Forging Workshop	A/ME/5	
8	Carpentry Workshop	B1/ME/3	119.56
9	Metals Forming Workshop	B1/ME/9	134.3
10	Polymers Forming Workshop	B1/ME/9	
11	Electricity Workshop	B2/ME/10	69.72
12	Automobiles Workshop	C/ME/6	74.87

Table 2: ME Laboratories of Mechanical Engineering Program

Laboratories of Mechanical Engineering Program		Room No.	Area (Sq. Mtr)
1	Machining Lab	A/ME/3	Included in Conventional Machining Workshop
2	Sand Testing Lab	A/ME/5	Included in Foundry and Forging Workshop
3	CNC Lab	B1/ME/1	91.8
4	Strength of Materials Lab	B1/ME/2	112
5	Theory of Machines Lab	B1/ME/4	108.73
6	Mechanical Design Lab	B1/ME/5	47.73
7	Systems Dynamic & Vibrations Lab	B1/ME/6	78.07
8	Automatic Control Lab	B1/ME/7	78.07
9	Materials Science Lab	B1/ME/8	162.54
10	Thermodynamic Lab	C/ME/1	109.83
11	Refrigeration & Air Conditioning Lab	C/ME/2	93.59
12	Hydraulic and Fluid Mechanics Lab	C/ME/3	199.04
13	Heat Transfer Lab	C/ME/4	100.83
14	Analysis of Materials Lab	C/ME/5	74.87
15	Combustion Lab	C/ME/6	74.87

Table 3: ME Laboratories used by Mechanical Engineering Department

Computer lab of Mechanical Engineering Program		Room No.	Area (Sq. Mt.)
1	AutoCAD Lab	29/A/I	96
2	AutoCAD Lab	30/A/I	96
3	Computer Lab for Engineers	35/A/I	96
4	AutoCAD Lab	38/A/I	96

Graduation Projects (Second semester 2017-2018)

Title	Supervisor
Determining Carbon Emissions Of Abha International Airport And Design Solution For Neutralizing Its CFP	Dr. Vineet Tirth Ram
Design And Testing New Strategies For Fog Collection Efficiency	Dr. Salem Ahmed M Algarni
Design And Performance Analysis Of A Solar Dryer	Dr. Ibrahim Elseesy
Design, Fabrication And Finite Element Analysis Of Ankle Foot Orthosis (AFO) Using 3D-Printing Process	Dr. Gulam Mohammed
Design And Fabrication Of Recirculating Impinging Jet Rig	Dr Ali Algahtani
Design And Construction Of Sterling Engine	Dr. Mostafa Abdelmohimen
Design And Fabrication Of Hot Air Turbulence Solar Still	Dr. Ashraf Lashin
Design And Analysis Of Metal Hydride Storage Vessels	Dr. Abhilash Edacherian

Title	Supervisor
Study Of A Thermal Energy Storage System For Enhancing Energy Efficiency In Buildings	Dr. Sofiene Habib Mellouli
Design And Construction Of Water Solar Heating System Using Evacuated Tubes	Dr. Baiumy Taha El-Assal
Finite Element Analysis And Design Optimization Of Automobile Bumpers	Dr. Gulam Mohammed
Development Of A Hybrid Composite For Tribological Applications	Dr. Abhilash Edacherian
Determinants Of Environment Footprint In Identified Public Place In KSA And Identifying Pathways Towards Green Society	Dr. Vineet Tirth Ram
Experimental And Computational Analysis Of Enhancing Passenger Comfort In An Automobile Cabin Using PCM	Dr. Ahamed Saleel
Design, Construction, And Testing Of Tubes In A Tube Heat Exchanger	Dr. Mostafa Abdelmohimen
Study Of Photothermoelectric Air Duct Cooling System For Sustainable Building Development	Dr. Kashif Irshad
Design A Pumping Station For A Water Treatment Plant	Dr. Ahmed Said

Faculty

The Mechanical Engineering department has a process for hiring excellent faculty and staff members, for continuous professional development and for facilitating the research work. The Mechanical Engineering department comprises of faculty with high academic achievements and a rich experience of teaching in various countries. In addition to the academic experience, many faculty members have experience in industries, consultancy works, and professional organizations. Faculty members are keen to do research and provide various trainings to the students to enhance their capabilities beyond the syllabus. The Mechanical Engineering faculty members also possess administrative experience at the college and the university levels. Some of the faculty members hold the administrative positions such as Vice Dean of the college, Vice Dean of Research at University Level etc. The department head of the academic program is responsible for all aspects of management of the program, including curriculum development, student assessment, schedule of classes and accreditation matters. The department head discharges his duties through the various academic committees formed of specialized faculty members for different aspects of management of the program. The department head reports to the Dean of the college. The Dean is the administrative position responsible for all aspects of the academic process in the college of engineering.

Faculty Workload

The assigned workload of the faculty is as per the academic rank in accordance with the university regulations. The teaching load assigned to the faculty without any extra remunerations are as given below.

- Professor: 10 credit hours
- Associate Professor: 12 credit hours
- Assistant Professor: 14 credit hours
- Lecturer: 16 credit hours

The faculty having the administrative responsibilities, in addition to the academic, is assigned lesser teaching load. The teaching load assigned is in line to support the faculty professional development, educational quality improvement activities and for facilitating their research work. The working hours are meant for teaching, research, academic advising, laboratory supervision, invigilation and any other tasks assigned to them.

Faculty Size

Currently, the Department of Mechanical Engineering has about forty-nine core faculty members which include Professors, Associate Professors, Assistant Professors, Lecturers and Teaching Assistants.

The current number of faculty and the ratio of students to faculty are significantly adequate to accommodate various needs of students including teaching (by introducing different sections as per the class size), reserving reasonable office hours for students, academic advising, etc. and to allow faculty members to perform other important tasks and duties related to administration, research, committees, professional development, etc.

In addition to the regular faculty, the teaching assistants are also appointed and some of them are sponsored by the University for their Higher Studies in abroad. The faculty members of Mechanical Engineering Department hail from diverse background and nationalities i.e. Saudi Arabia, Egypt, Tunisia, India, and Sudan. The list of faculty members is as given below.

Table: Faculty Details

Faculty Name	Academic Position	Email
Dr. Mohammed Hassan Sakr	Professor	msagr@kku.edu.sa
Dr. Amir Ibrahim Ali Arabi	Associate Professor	aarabi@kku.edu.sa
Dr. Vineet Tirth	Associate Professor	vtirth@kku.edu.sa
Dr. Faouzi Askri	Associate Professor	faskri@kku.edu.sa
Dr. Irfan Anjum B Magami	Associate Professor	Irfan@kku.edu.sa
Dr. Ali Muhammad Ali Alkuzaime Algahtani	Assistant Professor	alialgahtani@kku.edu.sa

DEPARTMENT OF ELECTRICAL ENGINEERING

Electrical Engineering Program Description

The Electrical Engineering Department offers a single major track program "Bachelor of Science in Electrical Engineering". The program approved by the authorized body (by MoE) via. MoHE/9683 on 05/08/1426. The program duration is five years divided into ten levels (semesters). The first and second levels are considered as 1st year program prior to core academics in the department.

The program was established to satisfy several significant targets like; servicing the industrial community on a scientific basic, transfer electrical engineering knowledge for local population, qualifying students for research in electrical engineering area, and qualifying electrical engineers in Electrical Power and Machines, Communications, Computer and Control areas

Electrical Engineering Program Vision

The department aims at excellence with a high degree of education and training. It provides advanced learning programs thereby satisfying the requirements of industries.

Electrical Engineering Program Mission

To impart high-quality education with a professional competency that prepares highly qualified electrical engineers who could use modern technology to carry out innovative research and engage in serving the community.

Program Educational Objectives (PEOs)

- The PEOs of the Electrical Engineering Undergraduate Program which are to be professionally accomplished so that our graduates will be able to:
- Establish themselves in productive and successful careers in electrical engineering or related area and function effectively in interdisciplinary teams involving design and/or support of engineering activities.
- Pursue advanced studies and scientific research, and engage in lifelong learning in electrical engineering and allied fields.
- Practice and inspire high technical standards and communicate their work and accomplishments to colleagues and the public.
- Contribute to community service through their technical expertise and skills while maintaining professional ethical conduct.

Department of Electrical Engineering

Level 1			
Course Code	Course Title	Credit Hours	Pre-requisite
011-ENG-6	Intensive English Program (I)	6	None
107-CHEM-4	General Chemistry	4	None
119-MATH-3	Differentiation and Integration (I)	3	None
111-GE-3	Engineering Drawing-I	3	None
Total Credits Hrs.		16	

Level 2			
Course Code	Course Title	Credit Hours	Pre-requisite
012-ENG-6	Intensive English Program (II)	6	011-ENG-6
111-IC1-2	The Entrance to the Islamic Culture	2	None
129-MATH-3	Algebra and Geometry	3	None
129-PHYS-4	Physics (I)	4	None
101-CMS-3	Computer Science	3	None
Total Credits Hrs.		18	

Level 3			
Course Code	Course Title	Credit Hours	Pre-requisite
211-ME-4	Engineering Mechanics	4	None
219-MATH-3	Differentiation And Integration -2	3	119-MATH-3
219-PHYS-3	Physics -2	3	129-PHYS-4
211-ME-3	Production Technology And Workshop	3	111-GE-3
211-EE-3	Electric Circuits -1	3	119-MATH-3, 129-MATH-3, 129-PHYS-4
Total Credits Hrs.		16	

Level 4			
Course Code	Course Title	Credit Hours	Pre-requisite
112-IC1-2	Islamic Culture -2	2	None
229-MATH-3	Differentiation And Integration -3	3	219-MATH-3
228-ME-3	Thermal Dynamics And Hydraulics	3	219-MATH-3, 129-PHYS-4
221-EE-3	Electric Circuits -2	3	211-EE-3
222-EE-3	Electric Measurements	3	211-EE-3
223-EE-3	Electronic Engineering	3	None
Total Credits Hrs.		17	

Level 5			
Course Code	Course Title	Credit Hours	Pre-requisite
113-IC1-2	Islamic Culture -3	2	219-MATH-3
319-MATH-3	Differential Equations	3	219-PHYS-3, 211-EE-3
311-EE-3	Electromagnetic Fields	3	211-EE-3
312-EE-3	Logic Circuits	3	211-EE-3
313-EE-3	Energy Conversion	3	222-EE-3, 223-EE-3
314-EE-1	Electric Testing -1	1	None
Total Credits Hrs.		15	

Level 6			
Course Code	Course Title	Credit Hours	Pre-requisite
301-NGL-2	Technical Reports Writing	2	012-ENG-6
329-MATH-2	Principles of Complex Variables And Special Functions	2	319-MATH-3
329-STAT-2	Principles of Statistics and Probabilities	2	None
321-EE-1	Electric Testing -2	1	312-EE-3, 313-EE-3
322-EE-3	Signal Processing	3	219-PHYS-3, 319-MATH-3
323-EE-3	Electronic Circuits -1	3	223-EE-3
324-EE-3	Computerized Methods for Engineering	3	101-CMS-3, 319-MATH-3
Total Credits Hrs.		16	

Level 7			
Course Code	Course Title	Credit Hours	Pre-requisite
201-Arab-2	Arabic Language Skills	2	None
424-IE-2	Engineering Economy	2	None
411-EE-3	Principles of Electric Machines	3	313-EE-3
412-EE-3	Automatic Control	3	221-EE-3, 319-MATH-3
413-EE-3	Communication Systems	3	322-EE-3, 329-MATH-2
414-EE-3	Computer Organization -1	3	312-EE-3, 329-STAT-2
Total Credits Hrs.		16	

Level 8			
Course Code	Course Title	Credit Hours	Pre-requisite
114-IC1-2	Islamic Culture -4	2	None
422-IE-2	Environment Engineering	2	None
421-EE-3	High Voltage Engineering	3	221-EE-3
422-EE-3	Electronic Circuits -2	3	323-EE-3
423-EE-1	Electric Testing -3	1	411-EE-3, 412-EE-3
424-EE-3	Computer Organization -2	3	414-EE-3
425-EE-3	Electric Power Systems	3	313-EE-3
Total Credits Hrs.		17	

Level 9			
Course Code	Course Title	Credit Hours	Pre-requisite
202-ARAB-2	Arabic Editing	2	None
591-EE-3	Graduation Project	3	None
511-EE-1	Electric Testing -4	1	413-EE-3, 424-EE-3
512-EE-3	Integrated Circuits	3	422-EE-3
513-EE-3	Microprocessor Based Systems	3	414-EE-3
514-EE-3	Power Electronics	3	221-EE-3, 223-EE-3
515-EE-3	Electric Testing -5	1	421-EE-3, 425-EE-3
Total Credits Hrs.		16	

Level 10			
Course Code	Course Title	Credit Hours	Pre-requisite
521-EE-3	Operating Systems	3	424-EE-3
522-EE-3	Electric Power System Analysis	3	425-EE-3
523-EE-3	Advanced Communication Systems	3	413-EE-3
524-EE-3	Software Engineering	3	414-EE-3
525-EE-1	Electric Testing (6)	1	422-EE-3, 424-EE-3
514-IE-2	Industrial Project Management	2	None
Total Credits Hrs.		15

Graduation Projects (Second semester 2017-2018)

Title	Supervisor
Raspberry Pi based interface with projector	Dr. Thafasalijyas Vayalpurayil
Power Quality and power factor correction in the low voltage distribution networks	Dr. Walid Helmy Abdel Hamid
Electric System Faults	Dr. Bushara salaheldin bushara
Arduino Operated Obstacle Avoidance Robot	Dr. Mohammed Abdel Majeed Abbas, Salman Arrafath Mohammed
Design and Experimental Investigation of Photovoltaic System Powered a Blower Fan	Dr. Abdelaziz Salah Saidi
Design of wireless smart home	Dr. Fakheruddin
Performance based comparative study of Genetic Algorithms for tuning of Fuzzy Logic Controller	Prof. Fazle Azeem

Title	Supervisor
Object detection and ranging using ultrasonic sound waves	Dr. Mohammed Zubair
Solar performance evaluation and climatic parameters modelling	Dr. Monji Mohamed Zaidi
Microcontroller based Disability Assistance System	Dr. Mohammed Usman
Prepaid Water meter	Dr. Muneer
Single phase to three phase converter for home appliances	Dr. Zakaria
Design and implementation of HEVC transform module on FPGA	Dr. Hassan

Faculty

The Department of Electrical Engineering has excellent hiring process for faculties in order to have continuous professional development and facilitating the research work of faculty. The Electrical Engineering department comprises of faculty with high academic achievements and a rich experience of teaching in various countries of the globe. In addition to academic experience, few faculties have experience in industry, consultancy and professional organizations. The Electrical Engineering faculties have also administrative experience at the college and the university levels. One of the Electrical Engineering faculties has been appointed recently as vice Dean of the college. The department head of the academic program is responsible for all aspects of management of the program, including curriculum development, instructional delivery, student assessment, schedule of classes and accreditation matters coordination. The department head discharges his duties through the various academic committees formed of specialized faculties for different aspects of management of the program. The department head is not responsible for personnel matters. The department head reports to the Dean of the college. The Dean is the administrative position responsible for all aspects of the academic process in the college.

Faculty Workload

The assigned workload of the faculty is as per the University current regulations and it is according to the academic rank of the faculty. Based on the rank and regulation, the teaching load assigned to the faculty without any extra remunerations are as given below.

1. Professor:	10 credit hours
2. Associate Professor:	12 credit hours
3. Assistant Professor:	14 credit hours
4. Lecturer:	16 credit hours

The faculty having the administrative responsibilities, in addition to academic, assigned lesser teaching load. The teaching load assigned is in line to support the faculty professional development, educational quality improvement activities and for facilitating their research work. The working hours are 40 hours per week. The working hours meant for teaching, research, academic advising, laboratory supervision, and any other tasks assigned to them.

Faculty Size

The program maintains 1:15 faculty to student ratio to comply the workload stipulation of the university guidelines. The program has 20 core faculties and designations wise distribution of the faculty is as follows:

- a. Professor 1
- b. Associate Professor 2
- c. Assistant Professor 12
- d. Lecturer 12
- e. Teaching Assistant 1

In addition to the above faculty, the teaching assistants are also appointed and some of them sent abroad for higher studies at the expenses of the university. The faculties of Electrical department hail from diverse background and nationalities i.e. Saudi Arabia, Egypt, Tunisia, India and Sudan.

Professional Development

Professional development has given prime importance to develop string program in the department. The university supports the faculty's professional development activities. At department level, it starts with new joining faculty for his professional development. The Head of the Department starts off with a short session with each new faculty member explaining what is required for the tenure process, and giving information about sources and infrastructure as well as their other proposed activities. The Head also assigns department coordinators to new faculty on their arrival for mentoring purpose.

The department faculty is encouraged to undertake research, attend conferences, workshops, and professional development programs, organize national and international conferences and seminars, and collaborate with experts in industry and academia, for consulting and professional practice, and where appropriate pursues higher studies.

Faculties are also offered incentive to formulate research proposal in collaboration with other faculties to develop a research culture in the department. The Department Head collect yearly performance profile of all the faculties and discussed with the Dean of the College to review and evaluation. The faculties are being awarded in recognition of their efforts in professional development and to develop interests, abilities and achievements as a both teacher and learners.

DEPARTMENT OF CHEMICAL ENGINEERING

Chemical Engineering Program Description

The Kingdom of Saudi Arabia has been blessed by vast natural resources that have been utilized for the development of the Country and its people. Due to this enormous expansion of development and engineering projects, emerged the need for the existence of the Chemical Engineering Department at King Khalid University. The Chemical Engineering Department is committed to provide highly qualified chemical engineers, who could conduct innovative research and provide services to the profession and the society through technical knowledge. The Department was established in 2007 with the mission of graduating national expertise. The Chemical Engineering Department at King Khalid University consists of seventeen academic staff and around 200 students among its five years program.

Chemical Engineering Program Vision

Providing education and knowledge of combining theoretical and practical knowledge of the specialty chemical engineering to serve the Kingdom and community value

Chemical Engineering Program Mission

The Chemical Engineering Department is committed to provide highly qualified chemical engineers, who could conduct innovative research and provide services to the profession and the society through technical knowledge.

Program Educational Objectives (PEOs)

The PEOs of the Chemical Engineering Undergraduate Program which are to be professionally accomplished so that our graduates are prepared to:

1. Pursue professional careers in the process industries, primarily as process engineers in leading roles.
2. Work effectively in corporate or government sector.
3. Function with ethical and environmental responsibility and will remain involved as full participant in the profession and society.
4. Follow advanced studies and research work.
5. Serve the community and the nation through technical expertise, innovative design, managerial skills and entrepreneurship.

Graduation projects (Second semester 2017-2018)

Title	Supervisor
Extraction of Potassium Bicarbonate from Polyamide-6 pellets-Experimental	Dr. Mohammed Khaloofah Al-Mesfer
Production of Ceramic Tiles.	Dr. Muhammad Arshad Nadir Khan
Catalytic Hydration of Ethylene to Produce Ethanol	Dr. Hamed Nasser Mohsen Ben Harharah
Boiler Calculation (In progress)	Dr. Atef EL JERY
Production of Sodium Dichromate	Dr. Moutaz Mustafa AbdElrahman Eldirderi
Recovery of Used Lubricating Oil	Mr. MD Mamoon Rashid
Production of cement in perspective of Kingdom of Saudi Arabia.	Dr. Chandrakant s. Sarkar
Extraction of Potassium Bicarbonate from Polyamide-6 Pellets	Mr. Mohd Danish
Production of sodium dichromate	Mr. Dhanaraja Dhanpal
Removal of Cadmium (Cd) and Lead (PB) metal ions from aqueous solutions by natural	Dr. Mohammad Ilyas Khan

Faculty

The faculty of the department Chemical Engineering (CHE) is well qualified and professionally committed to work for the department's vision and mission. The members of Faculty include doctorate and post-graduate degree holders, and a teaching assistant with bachelor's degree. The qualification, specialization and experience of the faculty members include various fields of Chemical Engineering, Environmental Engineering, Polymer Engineering, Metallurgy and Process Control Engineering to cover all courses of the curriculum. Their education and experience allows faculty to provide real time examples to the engineers. The faculty members have educations from prestigious Institutions from various nationalities other than the home country (KSA), including India, Sudan, Tunisia and Egypt.

The curriculum of Bachelor program in Chemical Engineering emphasize on the following areas:

- Heat, Mass and Momentum transfer
- Process Control and Instrumentation
- Reaction Engineering and Catalysis
- Polymer and Petroleum
- Environmental Engineering and Safety

Each Chemical Engineering faculty member is part of one or more groups according to their specialization. All theory lectures of the courses are taken by the doctorates according to their expertise and the laboratory courses are engaged by the Master's Degree holders. The faculty members are engaged in research and are in the process of research publications in high impact factor journals. Faculty members are also actively engaged in collaborative research with other universities, such as KAUST, with in Saudi Arabia.

Faculty Workload

Department of Chemical Engineering faculty team consists of eleven (11) doctorates and five (5) masters and one (1) graduate with basic chemical engineering degree. The courses are divided into different knowledge areas. Before allotting a course, the willingness and interests of each faculty member is sought, then the courses are allotted based on his area of specialization and his experience in teaching of that particular course. Faculty specialization spans all fields required to teach the complete courses offered in the curriculum.

The doctorates are specialized in the areas of their interests with the basic qualification of Chemical Engineering they are flexible to teach any core chemical engineering course. This flexibility helps in assigning the courses to the faculty members. To ensure the smooth conduction of the courses with high quality, only two courses are assigned to each doctorate, in special case it can be up to three. Apart from the teaching, all faculty members are also required to work for one or more committees. There are several committees at departmental level, college level and at university level. Each faculty member is also a student advisor. While allotting the teaching work, his involvement in other committees is also considered.

The eleven (11) Doctorates in the department of chemical engineering are teaching the core chemical engineering courses from level third onwards (up to level third, the courses are taught by the faculty of other departments). Apart from chemical engineering department, there are faculty members from other departments and colleges to teach courses such as mathematics, basic sciences, languages and general engineering courses.

The Department of Chemical Engineering is putting their best efforts to bring excellent teachers from all over the world. With more number of teachers, the workload of the present faculty members will gradually be reduced, which in turn will help the faculty members to focus on research as well as other academic development activities.

The department of Chemical Engineering has planned to recruit more doctoral degree faculty members in various specializations in Chemical Engineering within two years and it has stated the procedures to adopt quality professionals into the department. The vacant positions for new faculty members are advertised at website "<http://www.kku.edu.sa/en/node/2591/>". There are other various recruitment and employment procedures followed by the university, college and department level administration in order to attract qualified teachers from all over the world.

By publishing the job vacancy in local as well as international newspapers

- Assessing the qualified faculty members by inviting the CVs from the recruitment agencies of different countries. Shortlisting the candidates by their academic excellence, contribution towards research and conducting interviews for final selection.

- Conducting online interviews via Skype for geographically distant located aspirant faculty members
- The department was successful in attracting qualified faculty members by following the above mentioned procedures.
- This academic year (2015-2016), PhD holder is recruited at the rank of full Professor.

The department is expecting few more faculty members with doctorate degree from prestigious universities from different countries and recruitment is in progress.

As the department gets more qualified faculty members, the distribution of workload will be done accordingly and extra time will be spent for research activities.

Faculty Size

The Chemical Engineering department, currently, has 17 Faculties comprising of two Professors, one Associate Professor, eight Assistant Professors, five Lecturers and one Teaching Assistant to teach the Chemical Engineering Program and designations wise distribution of the faculty is as follows:

- Professor 2
- Associate Professor 1
- Assistant Professor 10
- Lecturer 5

In addition to the above faculty, the teaching assistants are also appointed and some of them sent abroad for higher studies. The faculties of Chemical department hail from diverse background and nationalities i.e. Saudi Arabia, Egypt, Tunisia, India and Sudan.

Professional Development

Faculty members are committed and very active in all professional activities. Many faculty members are in the process of publishing research papers. During the university research day the chemical engineering department has contributed immensely in the various fields of faculty members' specialization. The University encourages staff to attend technically renowned conferences and publish research papers. The faculty research areas include core Chemical Engineering areas, Environmental Engineering, Polymer and Petroleum Engineering, Catalysis etc.

DEPARTMENT OF INDUSTRIAL ENGINEERING

Industrial Engineering Program Description

Kingdom of Saudi Arabia has been blessed by vast natural resources and these resources have been utilized for the progress of the country and welfare of its people. The proper utilization of these natural resources led to the opening of Industrial Engineering under College of Engineering (COE) at King Khalid University (KKU).The authorized body i.e. MoE (private institutions and Council of Higher Education for public institutions) has approved. The Industrial Engineering Department was established in year 2007 at the Gareiger main campus of King Khalid University with the objective of graduating students having expertise in all the aspects of Industrial Engineering (<http://industrial.engineering.kku.edu.sa/en/content/275>).

Industrial Engineering Program Vision

Achieving leadership in the field of Industrial Engineering in fields of education, scientific research and rendering community services in the Kingdom of Saudi Arabia.

Industrial Engineering Program Mission

Build within students a solid foundation in industrial engineering, expands the reasoning, communication and problem solving abilities of students, and prepare graduates who have the motivation and ability for lifelong growth in their professional careers and addresses the evolving needs of industry and society

Program Educational Objectives (PEOs)

- (PEO1)- Pursue advanced study if they so desire in the field of Industrial Engineering and life-long learning in their professional environment.
- (PEO2)- Competent to provide industrial solutions at diversified environment and meet the expectations of employers of Industrial Engineers.
- (PEO3)- Demonstrate competencies as a professional in a broad Industrial Engineering domain.
- (PEO4) -Ensure safety environment, economic, social, cultural, and ethical issues in their profession.
- (PEO5)- Able to communicate effectively and actively participate individually and in teamwork. Engineering.

Faculty

The IE department has a process for hiring the excellent faculty, for continuous professional development and for facilitating the research work of faculty. The IE department comprises of faculty with high academic achievements and a rich experience of teaching in various countries of the globe. In addition to academic experience, the many faculties have experience in industry, consultancy and professional organizations. The IE faculty have also administrative experience at the college and the university levels. The department head discharges his duties through the various academic committees formed of specialized faculties for different aspects of management of the program. The department head is not responsible for personnel matters. The department head reports to the Dean of the college. The Dean is the administrative position responsible for all aspects of the academic process in the college.

Faculty Workload

The assigned workload of the faculty is as per the university current regulations and it is according to the academic rank of the faculty. Based on the rank and regulation, the teaching load assigned to the faculty without any extra remunerations are as given below.

Professor:	10 credit hours
Associate Professor:	12 credit hours
Assistant Professor:	14 credit hours
Lecturer:	16 credit hours

The faculty having the administrative responsibilities, in addition to academic, assigned lesser teaching load. The teaching load assigned is in line to support the faculty professional development, educational quality improvement activities and for facilitating their research work. The working hours assigned for Saudi faculty are 35 hours per week and for faculty on yearly contract, the working hours are 40 hours per week. The working hours meant for teaching, research, academic advising, laboratory supervision and any other tasks assigned to them.

Faculty Size

Discuss the adequacy of the size of the faculty and describe the extent and quality of faculty involvement in interactions with students, student advising and counseling, university service activities, professional development, and interactions with industrial and professional practitioners including employers of students.

Currently, the department of IE has 04 Asst. Professors, 01 Associate Professor, 5 lecturers with M.Sc. degree and 2 with B.Sc. degree Teaching Assistants.

In addition to the above faculty, the teaching assistants are also appointed and some of them sent abroad for higher studies. The faculties of Industrial Engineering department possess from diverse background and nationalities i.e. Saudi Arabia, Egypt and India.

Professional Development

Professional development has given prime importance to develop strong program in the department. The university budgetary provision supports the faculty's professional development activities. At department level, it starts with new joining faculty for his professional development. The head of the department starts off with a short session with each new faculty member explaining what is required for the tenure process and giving information about sources and infrastructure as well as their other proposed activities. The head also assigns department coordinators to new faculty on their arrival for mentoring purpose.

The department faculty is encouraged to undertake research, attend conferences, workshops and professional development programs, organize national and international conferences and seminars, collaborate with experts in industry and academia, for consulting and professional practice, and where appropriate pursues higher studies. Faculty are also offered incentives to formulate research proposal in collaboration with other faculties to develop a research culture in the department. The department head collect yearly performance profiles of all faculties and discussed with the Dean of the College to review and evaluation. The faculty are being awarded in recognition of their efforts in professional development and to develop interests, abilities and achievements as a both teachers and learners.
